JET AIR OVEN PROOFER JAOP10

The JAOP series from Doyon is known worldwide for its unique and patented Jet Air System (the air moves in one direction for 2.5 minutes, stops for 25 seconds then moves the other way for 2.5 minutes) resulting in a gentle velocity air flow for exceptional baking results. This system will help you bake faster and more evenly without having to turn your pans at half of the baking time. (Ex: Competitor units will bake only on one side or unevenly, muffins blow over, bakes only the outside, etc.). Our competitor ovens allow the air to move in one direction only. Doyon ovens will bake better and your employees will continue preparations without worrying about turning pans.

Doyon's outstanding uniform steam injection system includes an electronic timer which will give you a precise mist everytime for a better quality product (crusty breads, bagels, french baguettes, etc.). This superior steam system will allow inexperienced employees to produce quality products with a minimum of training.

Doyon's proofer provides uniform proofing from top to bottom with its even air flow system and fully automatic humidity injection (no water pans to fill). It comes with heat and humidity controls. It's the easiest way to proof.

VERSATILITY

Bread, rolls, buns, crusty breads, pastries, muffins, cookies, cakes, pies, bagels, croissants, sours & ryes, pizzas, hamburgers, bacon, game hens, chicken, turkey, multimeal prep, bulk vegetables, casseroles, slow cook, retherm.
