Drop-In napkin dispensers

**Short Form Specifications**

Evaluating mechanism shall have two extension springs which support the napkin carrier head. Top supporting flange shall be 16-gauge stainless steel. Dispenser body shall have four vertical angle guides fastened to the top flange and bottom. Napkin cover shall be 20-gauge stainless steel and snap onto top flange to hold napkins in place. Corner angles and bottom shall be constructed of 22-gauge stainless steel.

All models shall hold up to 500 paper napkins at an 18.00" (45.7cm) stack height (capacity will vary depending on style of napkins being dispensed).

**Optional accessories & modifications**

- Dispensers for other size napkins available upon request
- Special heights available

Drop-In "clamshell" disposable tray dispensers

**Short Form Specifications**

The dispenser body shall have a 16-gauge stainless top flange and vertical angle guides and a 22-gauge stainless steel bottom. The elevating mechanism shall consist of two properly calibrated extension springs to support the 22-gauge stainless steel carrier head. The fanner mechanism shall be formed hinged stainless steel adjustable bracket which shall swing up for loading (a hold down rod may be used in lieu of the adjustable bracket; this will be determined at the factory on the basis of the clamshell samples provided).

NOTE: All Model DD dispensers are built to custom specifications. A 20.00" (50.8cm) high stack of sample clamshells must be provided to allow Delfield to determine what type of dispenser will be required. Dispenser specifications and dimensions will vary.
