

GLO-RAY® NARROW INFRARED FOODWARMERS

Models GRN-18, -24, -30, -36, -42, -48, -54, -60, -66, -72
GRNH-18, -24, -30, -36, -42, -48, -54, -60, -66, -72

Hatco Glo-Ray Narrow Infrared Foodwarmers keep all hot foods at optimum serving temperatures longer. Foods do not dry out or become discolored; even the most delicate dishes hold that "just-prepared" look. The Glo-Ray pre-focused heat pattern directs heat from a tubular element to bathe the entire holding surface.

FLEXIBILITY

The continuous painted steel housings, up to 6' (1829 mm) in width, are available in six powdercoated colors to match any décor. The high watt and standard watt models come with non-adjustable 1½" (38 mm) angle brackets. Accessorize units with non-adjustable tubular stands in decorative colors.

The slim line strip heaters are only 2" (51 mm) high and 4" (102 mm) deep, ideal for minimal sight obstruction of food product in heated buffet areas.

Remote control enclosures are available in several sizes, built in accordance with UL Standards to accommodate switches, indicator lights and wiring, ready for installation.

An on-off switch may be installed in front or back of the unit to suit the location.

QUALITY

The following features assure the finest performance for years to come:

- The slim design with 2" (51 mm) height and 4" (102 mm) depth keep the focus on the food in buffet lines.
- Available in widths from 18" to 6' (457-1829 mm).
- Sturdy continuous painted steel housings available in six powdercoated colors.
- Pre-focused heat maintains serving temperatures longer without continuing to cook the food.
- Variety of models, configurations, colors and accessories provide unlimited design flexibility.

Model GRN-24 with standard angle brackets and Designer color
