

Spring-steel core keeps them slim and sturdy

Steel-Reinforced Utensils

Simple tools can't hide their imperfections. That's why we obsessed over every detail in our steel-reinforced utensils. Made of silicone with a full-length spring-steel core, our spatulas have just the right amount of flex for your needs. Sharp, firm edges provide efficient scraping coverage and a mix of curves and notches mean no matter what the shape of the container, even tight corners, the fit will be perfect. Seamless construction is graceful and eliminates food traps.

- Full-length spring-steel core keeps its shape and provides flex
- Sharp edges are efficient and accurate
- Heat resistant to 600 °F (315 °C)
- Seamless homogenous design is hygienic and dishwasher safe
