Star-Max® Vertical Broilers

□VBE30 □VBG30

VBE30

DESCRIPTION

Star-Max® vertical broilers are designed for display cooking and Mediterranean style restaurants in mind. These broilers provide high performance broiling for a crisp, juicy, and flavorful taste and are perfect for diverse menu selections. The broilers have a 5–45 lb. (2.3–20.4 kg) meat capacity with a fully adjustable range of temperature to meet virtually any product’s needs.

SPECIFICATIONS

Star-Max® vertical broilers will be constructed with stainless steel front and side panels. The back, bottom, rotisserie rod, and pans are constructed of aluminizes steel. Broilers will have a 5–45 lb. (2.3–20.4 kg) meat capacity with a fully adjustable range of temperature.

ELECTRIC MODELS—These will be available in 208 V, 230 V, or 240 V versions. 208 V and 240 V versions will come with a 7.5 ft. (2.3 m) cordset with a NEMA 6-30P plug. 230 V units will not have an attached cordset. These units will utilize incoloy sheath type elements.

GAS MODELS—These units will require a 120 V connection using a 5-15P plug. Gas units will have adjustable valves and standing pilot. These units will utilize ceramic heating elements.

WARRANTY

These units come with a one [1] year warranty for parts and labor.

FEATURES

- Full rotisserie rod for maximum control of broiling speeds and accommodate a variety of meat products and sizes
- Fully adjustable range of temperature for precise cooking performance
- 5-45 lb. (2.3–20.4 kg) meat capacity
- Adjustable heat shields concentrate heat for cooking and direct heat away from the operator allowing for faster cook times and reduced energy costs
- Automatic friction drive stops rotation during slicing allowing for quick and easy carving
- Simple disassembly for easy cleanup

OPTIONS

- Gas [LP or natural gas versions] or electric [208 V, 230 V, or 240 V] versions available

Star-Max® Vertical Broilers

□VBE30 □VBG30

VBG30 shown. VBE30 has the same basic body measurements. The rear power connection on electronic units is approximately 3 in. (76 mm) from the bottom and 2 in. (51 mm) from the left side of the unit.

CLEARANCES

All units will require 3 in. (76 mm) of clearance on the rear of the unit and 12 in. (305 mm) clearance on each side from combustible surfaces. No clearance is necessary from non-combustible surfaces.

MODEL	HEIGHT in. (mm)	WIDTH in. (mm)	DEPTH in. (mm)	VOLTS	BTUs [GAS MODEL]	AMPS	Watts	NEMA PLUG	APPROX. SHIP WEIGHT	APPROX. INSTALL WEIGHT
