Ice Merchandiser

Ice Merchandisers
 Glass Door Merchandisers

Model : TGIM-23

FEATURES & BENEFITS

- **Digital temperature control & monitor system**

 - Keep food products safe by maintaining constant temperatures.
 - Alarms that sound when doors are not sealed shut; protect against food spoilage that originate from cold air leaks.
 - Digital display allows for easy monitoring.
 - Programs interpret the condition of refrigeration systems by self-diagnosis.
 - Smart fuzzy logic defrost system.
 - Automatic evaporator fan motor delays.
- **Ice does not melt even in hot climates**

Turbo Air ice merchandisers are based on a freezer system which is adjusted to the ideal temperature range for bagged ice storage, whereas our competitors use refrigerator based systems. It maintains an avg. temperature of 12°F or below and eliminates ice melting problems during hot weather conditions.
- **Triple pane heated glass doors**

Equipped with unique triple-pane heated glass doors which enhance energy efficiency by preventing heat transfers and minimizing condensation. Lightweight door construction reduces door maintenance, bushing wear, and facilitates smooth door opening.
- **LED advertising panel**

LED lighting offers 5 times longer lasting life than fluorescents and conserves energy as well.
- **Efficient refrigeration system**

Turbo Air's freezers are designed with oversized and balanced (CFC Free R-134A or R-404A) refrigeration systems. These include efficient evaporators and condensers for faster freezing and greater efficiency.
- **High-density polyurethane insulation**

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.
- **LED lighting interior**
- **Magnetic door gaskets**

Magnetic door gaskets are of one piece construction, removable without tools for ease of cleaning and replacement.
- **Bottom mount compressor units**

Turbo Air's bottom mount compressor allows easier access for service and extra storage space above. In addition, the lower area provides a cooler and less greasy operating environment which results in reduced compressor running time.
- **Freezer holds 10°F ~ 15°F for the best in bagged ice storage**
