- Flash-steam generation makes conventional steam generator obsolete:
 - Eliminates steam generating boiler maintenance
 - Ends boiler heating element burn-out
 - Maintains steam levels without a water reservoir
- Cook by internal product temperature or time with temperature variable steam, convection heat, or a combination of both to roast, steam, bake, or oven-fry in a single piece of equipment.
- Provides increased food quality and expands menu options while increasing production efficiency and speed by as much as 70-percent compared to conventional cooking methods.
- EcoSmart™ technology reduces energy cost by using less electricity and water during both normal operation and the cleaning function.
- Gold-n-Brown™ feature provides the operator with the ability to add additional product color.
- CombiClean™ feature uses scrubbing jets of water for fully automatic cleaning. Use either commercial-strength CombiClean Tablets or Combitherm Cleaning Liquid Spray.
- Standard and Deluxe control offers additional moisture injection, Delta-T cooking, multiple language display, and other features.
- Enhanced safety feature includes automatic steam venting immediately before cooking time expires. (U.S. Pat. 7,282,674)
- CombiSmoke™ is an optional feature — patented smoking technology (U.S. Pat. 7,157,668; EU Pat. 1659911) that gives operators the unique ability to smoke any product, hot or cold.
