APPLICATION

At Bloomfield, our innovation goes beyond brewing the perfect decanter of coffee. We build equipment that makes brewing simple, so you're able to serve your customers better. Our line of Eco-Brewers are designed for two key reasons: Economy price and Eco friendly because this brewer does not use a traditional water tank that is constantly being heated. Bloomfield utilizes a fresh water heat pump system that only consumes energy while it's brewing. This equipment is easy to operate, simply add fresh water.

FEATURES
