with optional
decanters

8543-D2
with optional
decanters

If you're looking for rich, flavorful coffee but are tight on counter space, plug in the Bloomfield Lo-Profile® Pour-Over brewing system. At a little under 17" tall, it's short in stature, but long on features. Like all Bloomfield products, this proven, efficient brewing system is designed to take advantage of the finest electrical components and has the lowest service cost in the industry for this type of brewer. Our exclusive water delivery system spreads a precise amount of water over the coffee grounds for complete saturation and much better taste.

Features

- A high level of commonality of part with other Bloomfield models will significantly reduce the inventory of spare parts required to service many body styles.
- Exclusive design provides easy access to components for quick service.
- Ready-to-Brew light indicates the proper water temperature to help eliminate the guesswork in brewing.
- Premium quality thermostat has a full-length sensing bulb that recognizes water temperature accurately and cycles less frequently.
- One-piece drawn stainless steel water tank has a superior design for extended life.
- Superior sprayhead design spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full, rich essence of every bean.
- Porcelain enameled warmer plates position decanters securely and, with no exposed screwheads, will not scratch or scrape decanters.
- High-quality, easy-to-clean stainless steel construction.

Accessories

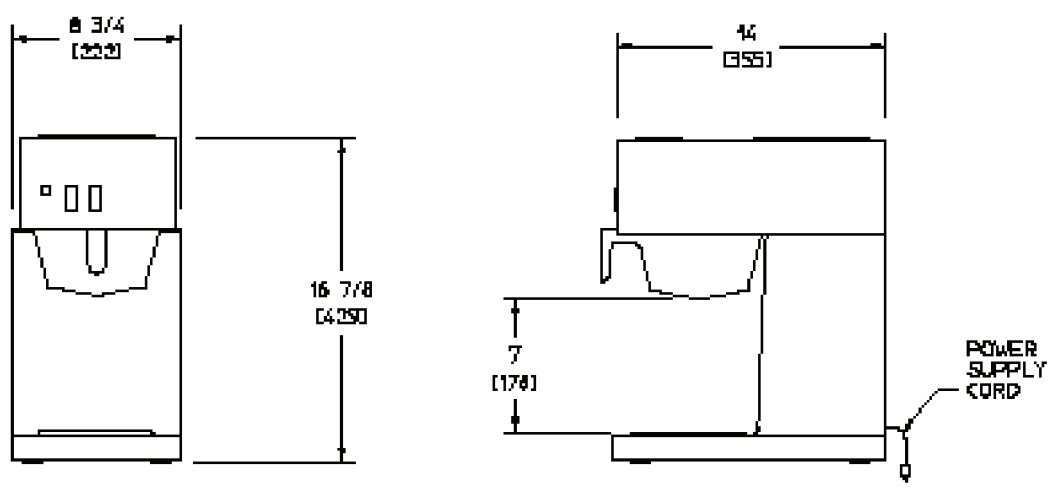

Bloomfield offers a line of coffee warmers and glass decanters.
