

8783 Gourmet 1000™ Pour-Over Airpot Coffee Brewer

8785 Gourmet 1000 Pour-Over Airpot Coffee Brewer

8785XL Gourmet 1000 Extra-Low Pour-Over Airpot Coffee Brewer

Airpot coffee brewers offer volume brewing, proper extraction and holding capacity in a limited space. The 8785XL, at an extra-low profile of 17 3/4", is sure to fit on those counters with minimum height clearance. These uniquely designed units eliminate flow control problems. Coffee is brewed into a thermal server or airpot which is easily transportable to remote serving areas where coffee will remain preserved for optimal temperature and taste.

Features

- **A high level of commonality of parts** with other Bloomfield models will significantly reduce the inventory of spare parts required to service many body styles.
- Exclusive design provides **easy access to components** for quick service.
- **Ready-to-Brew light** indicates the proper water temperature to help eliminate the guesswork in brewing.
- **Premium quality thermostat** has a full-length stainless steel sensing bulb that recognizes water temperature extremely accurately and cycles less frequently.
- **One-piece drawn stainless steel water tank** has a superior design for extended life.

- **Superior sprayhead design** spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full, rich essence.
- **Rugged base rails** provide stability and strength, while minimizing brewer height and locating placement of airpot.
- High quality easy to clean **stainless steel construction**.

Accessories

Bloomfield offers a full line of airpot, thermal servers and coffee grinders.
