- DXIDT1S1520
- DXIDT1S1622

Double

- DXIDT2S1418
- DXIDT2S1520
- DXIDT2S1622

Application

These self-leveling mobile tray dispensers are offered in two styles: Single stack, tubular frame with solid bottom, and double stack, tubular frame with solid bottom. These self-leveling mobile tray dispensers can be found in tray lines, in the front or back-of-the-house, or any place your needs require.

Construction

The lifting mechanism is constructed of type 304 stainless steel with all exposed parts having a No. 4 finish. The Mobile Tray Dispenser is equipped with self-lubricating delrin wheels and a full complement of stainless steel extension springs which can be easily disconnected to adjust the lifting rate.

A removable stainless steel carrier tray provides bottom support for trays being dispensed.

The base is fabricated of stainless steel and reinforced with 16-type 304 stainless steel angles. The tubular frames are fabricated from 16-gauge stainless steel tubing and securely welded to stainless steel angles on underside of base. The tubular frames are reinforced by horizontal 3/8" diameter type 304 stainless steel rods welded to each vertical frame. Four 5" heavy-duty non-marking swivel casters (2 with brakes) are securely mounted to the base and a non-marking bumper is attached at each corner.

Standard Features

- Stainless steel construction including stainless steel extension springs for long lasting dependable service.
- Patented self-leveling mechanism lifts out for easy cleaning.
- Field adjustable to accommodate different weights.
- Corner Bumpers

Warranty

One year parts and labor.
