

Fresh ideas in foodservice equipment

Warming Station

Model: WS-13

Compact Unit for Holding and Warming Fried Foods

The Warming Station uses radiant heat technology (top and lower heat) to extend freshness for a variety of fried foods including nuggets, fingers, fries, wedges, etc. Keep fried foods moist and delicious and “presentation ready” for a longer hold time. Also, a full-size, 2 ½” deep steam table pan fits into the dump bin; this along with the design of flat surfaces provides easy cleaning of unit. Unit is designed to fit into countertop.

BKI's WS-13 Warming Station

Agency Approvals:

Standard Features:

- 10lb. Holding Capacity
- Removable Parts and Flat Surfaces for Easy Cleaning
