Solid Slide Lid Glass and Plate Chiller/Froster with Hydrocarbon Refrigerant

T-50-GC-HC

AIA #

- True's glass and plate chiller/ frosters are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.
- Factory engineered, selfcontained, capillary tube system using environmentally friendly R290 hydro carbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- Large storage capacity to meet the supply and demand requirements during peak hours.
- High capacity, factory balanced refrigeration system that maintains cabinet of 0°F (-17.7°C) and below.
- Forced-air cooling, positively guided airflow provide efficient balanced temperatures throughout the cabinet. This unique design ensures fast frosting of dry glasses and plates.
- Exterior Stainless steel countertop and lids, black powder coated cold rolled steal front, sides, and back.
- Interior long lasting, heavy duty galvanized steel.

Underbar Refrigeration: Solid Slide Lid Glass and Plate Chiller/Froster with Hydrocarbon Refrigerant

STANDARD FEATURES

DESIGN

 True's glass and plate chiller/frosters are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains cabinet of 0°F (-17.7°C) and below.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Automatic defrost system timeinitiated, time-terminated.

• Condensing unit accessed from behind front grill, slides out for easy maintenance.

• Forced-air cooling, positively guided airflow provide efficient balanced temperatures throughout the cabinet.

CABINET CONSTRUCTION

- Exterior Stainless steel countertop and lids, black powder coated cold rolled steal front, sides, and back.
- Interior long lasting, heavy duty galvanized steel.
- Insulation entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.

SHELVING

Five (5) adjustable, heavy duty PVC coated wire shelves 15 ½ "L x 19 ½ "D (385 mm x 491 mm). Split shelf design allows for effective rotation of chilled small ware, working with already chilled plates and glasses on one side while chilling dry product on the other side.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Listed under NSF/ANSI Standard 7 for the storage and/or display of packaged or bottled product.

ELECTRICAL

• Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

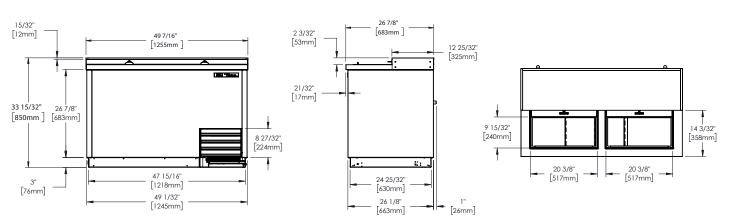

OPTIONAL FEATURES/ACCESSORIES

Upcharge and lead times may apply. □6" (153 mm) standard legs.

- □ 6" (153 mm) seismic/flanged legs.
- □ 2 ½ " (64 mm) diameter castors.
- □ 3" (77 mm) diameter castors.

Ratchet locks and handles. Requires one per lid.

Generation Floor racks.
